EDUCATION

R.V. College of Engineering

Bengaluru

B.E. in Computer Science and Engineering

CGPA: 8.91

2022 - 2026

Relevant Coursework: Deep Learning, Web Frameworks, AIML, Operating Systems, DSA

WORK EXPERIENCE

Boeing

May 2025 – July 2025

Software Engineering Intern

Bengaluru, India

- Developed and optimized the frontend of a Next.js application used to monitor parts inventory and logistics for International Space Station (ISS) operations.
- Improved page load time by approximately 30–40% by reducing redundant API calls and optimizing client-side data fetching.
- Integrated REST APIs to enable accurate and real-time data rendering across multiple dashboards.
- Redesigned UI workflows to improve usability and reduce interaction friction across key screens.

Ruaa Ventures Private Limited

Jan 2025 – May 2025

SDE Intern

Remote

- Built and enhanced core frontend features for the Kanoon mobile application with 1K+ downloads.
- Contributed to the design and implementation of key user flows, improving usability and interaction quality.
- Developed reusable UI architecture to ensure consistency across multiple screens.
- Collaborated with backend and design teams to integrate APIs and deliver a cohesive user experience.

PROJECTS

InterviewAssistant

React, FastAPI, GPT-OSS, Groq

 Live

 Code

- Built an AI-powered interview agent simulating real-world technical interviews with conversational, voice-enabled interaction.
- Designed a guided interview flow with intro, single-question turns, adaptive probing, and feedback.
- Integrated GPT-OSS as the primary model with Llama 3 fallback, ensuring robustness and continuity during inference.
- Developed real-time voice interaction using Groq Whisper for speech-to-text and Orpheus for text-to-speech.
- Designed session-based state management to maintain context and ensure continuity across interview interactions.

UpWell

React Native, Expo, SQLite

 Live

 Code

- Built a cross-platform mobile application for tracking finances, health, and mindfulness in a unified system.
- Designed a local-first architecture using SQLite, ensuring complete data ownership with no cloud dependency.
- Developed a multi-domain data model supporting expenses, workouts, journaling, and habit tracking.
- Implemented a gamification system with XP, levels, streaks, and activity heatmaps to improve engagement.
- Added JSON-based export and import functionality for secure data backup and portability.

SKILLS

Programming Languages : Python, JavaScript, SQL, C, Java

Frameworks and Libraries : React, NextJS, Django, FastAPI, PyTorch

Tools and Technologies: Git, pgAdmin, Firebase, Vim

CERTIFICATIONS

Responsive Web Design by freeCodeCamp

Gemini API by Google

AI Fundamentals by DataCamp

Introduction to React Native by Frontend Masters

Introducing Generative AI with AWS

Postman API Fundamentals by Postman

ACHIEVEMENTS

Secured 1st place among 200+ teams in the 36-hour Quant-A-Maze 2.0 hackathon conducted at NITTE Meenakshi Institute of Technology.
